Production and installation of energy smart meters on the network	

7 - Substitution of 2G meters in the electricity distribution service

The technological innovation applied to management processes is assuming an ever-growing role for Acea as it aims the enabling of the development of the so-called ‘smart-living’, and clear impacts on energy savings. In particular, Areti is engaged in the massive substitution campaign with the new generation 2G meters, for a total of more than a million devices. The characteristics of those meters will provide clients with more data and more awareness, together with narrowing the expected estimates on invoices.
